Automation & Testing Tools

Selenium, Cypress, TestComplete, ReadyAPI, Postman, UFT, Playwright

Languages

Java, JavaScript, C#, Typescript

DevOps & Process

Azure DevOps, CI/CD, Agile/Scrum, Git Bash

EDUCATION

Faculty Training Institute

2023

Applied Programme in Software Testing

Boston City Campus

Currently Studying (ETA – 2026)

Diploma in Software Development

ISTQB Foundation Level

EXPERIENCE

Associate Test Automation Engineer - Nintex

Feb 2025 - Feb 2026

I participated in multiple regression testing cycles to ensure system stability and prevent the reintroduction of defects. I tested new features, defect fixes, and code changes, while also triaging and validating reported bugs. In addition, I contributed to the creation of ITests for newly developed features and expanded automated test coverage to improve overall test efficiency and product quality. I also assisted with client-reported incident investigations, analyzing issues and helping to identify and communicate effective workarounds.

Automation Tester – Telesure Investment Holdings

Nov 2023 - Feb 2025

I have been responsible for delivering both manual and automated testing across multiple web-based applications, ensuring quality throughout the development lifecycle. My role includes API and mobile testing across various projects, as well as creating, executing, and maintaining detailed test cases, test plans for new initiatives, and SIT signoff documentation. I also configure and manage automation pipelines to support continuous testing. In addition, I actively participate in Agile ceremonies such as backlog grooming, sprint planning, and retrospectives, contributing to effective collaboration and continuous improvement within the team.

Junior Test Automation Engineer – iOCO Digital

Aug 2022 - Nov 2023

I performed both manual and automated testing across multiple web-based applications, ensuring functionality, reliability, and overall quality. My responsibilities included conducting API testing on several projects and performing mobile testing across different platforms. I also created, maintained, and executed detailed test cases and completed SIT signoff documentation to support successful project delivery.
